# Frieling French Press

## Description:

Beautiful? Yes! But, there is more than what meets the eye. Double-wall construction keeps coffee or tea hot and cold drinks cold longer.

## The Winner Of

### **Best Stainless Steel French Press Coffee Maker**

**Why it's best:** Made of 18/10 stainless steel, double-walled for strength and better heat retention, the Frieling is a sleek, sturdy, indestructible maker that produces wonderful coffee without fuss or electricity, and keeps it warm longer than its glass-based competitors.

It's so handsome and functional that it also doubles as a serving pitcher for juice or other liquids. It makes and holds a large amount of coffee for a French press. It's well built, and is fairly easy to clean. And you can purchase matching Frieling accessories like creamers and sugar bowls.
